[1] Setting and Infrastructure (SI)

[1.7] Total campus buildings area (meter^2)

UPI operates multiple campuses across different regions as part of its commitment to expanding equitable access to higher education, with academic services tailored to the needs and characteristics of each location. These variations in academic focus and the range of supporting facilities contribute to differences in building area across campuses. Campuses that offer a wider scope of academic programs and more comprehensive facilities such as laboratories, student activity centers, auditoriums, and sports facilities naturally require larger building areas than those with a more specific academic mandate. In total, the overall campus building area across all UPI locations reaches **691,395.60 m²**, reflecting the university's capacity to provide adequate infrastructure while remaining adaptive to diverse educational needs across regions.

Table. 1 Building Name and Total Area of UPI Campus

No	UPI Campus	Total Building Area (m²)
1	UPI Bumi Siliwangi	616,526.36
